OBJECTIVE - Data Scientist Jr.

PROFESSIONAL SUMMARY

Highly motivated professional passionate about technology, with a strong desire to grow in the field of Data Science.

During my internship in the Machine Learning with AWS Scholarship program, provided by UNIVESP in conjunction with Compass.uol, I worked on various practical projects and gained proficiency in using the AWS system for project deployment, programming languages such as Python and JavaScript, NoSQL databases, Agile methodologies with Scrum.

As a School Organization Agent, I developed organizational, communication, and system management skills, working directly with parents and students, and operating the State of São Paulo Education Secretariat's SED (Digital School Secretary) system. Experience in handling diverse audiences and efficiently managing sensitive information.

Proficient in tools such as Microsoft Office (Word, Excel), Anaconda, Visual Studio Code (Vscode), Canva.

Key competencies: Good communication, problem-solving, adaptability, logical reasoning, analytical, and organizational skills.

PROFESSIONAL EXPERIENCE

E.E Profº Francisco Napoleão Maia

School Organization Agent - 07/2023 - Present

- Responsible for maintaining the organization of the Secretary's office;
- Handling the Digital School Secretary (SED) system;
- Providing assistance and guidance to parents and students;
- Handling enrollments, transfers, records, and issuing school transcripts;
- Supporting in playground supervision.

Key Achievements:

- Ensured efficient organization of the School Secretary's office, optimizing workflows, and creating a more effective working environment.
- Mastered the Digital School Secretary (SED) system, resulting in more efficient management of school records and a reduction in administrative errors.
- Strong communication and empathy skills, providing quality service to parents and students, addressing queries, and providing relevant guidance.

Machine Learning with AWS Intern - 02/2023 to 07/2023

- Acquired fundamental knowledge of AWS Cloud, Machine Learning, and Artificial Intelligence;
- Focused on data processing, predictive model building, and deployment using AWS;
- Application of knowledge in real-world projects, simulating the day-to-day tasks of a professional in the field.

Key Achievements:

- Significant social development working in various teams for project production, including a leadership role in the final project of the Scholarship Program;
- Time management and organization using Agile methodologies (Scrum).
